The Probable Suspension in France and England We believe that all thoughtful financiers now re gard a suspension of specie payments by the Banks of France and England as among the strong probabilities, which must ripen into certainty with the continuance of the war, and the latter event appears to be as nearly a fixed fact as any future event can be The war cannot be continued two years longer without a resort to suspension, and there is no earthly reason to suppose that peace will be concluded with in that time. Of course the shrewd financiers who manage these matters at the financial centre-London-if they feel the ultimate necessity will not wait to be driven into this measure, but will adopt it in advance, and a repeal of Sir Robert Peel's Bill, re stricting the issues of the Bank and establishing a certain maximum of circulation and a minimum of bullion, is looked forward to as one of the acts expected from Parliament at its next ses And at the same time it is quite probable that some action similar to that adopted under the administration and by the direction of Mr. Pitt will be resorted to. The Bank of England, and with it, of necessity, the other Banks of the United Kingdom, will be allowed to suspend specie payments, and their bills so suspended will be be made a legal tender in payment of all debts.

Specie, thus ceasing to be the circulating medium in England and France, will become an article of commerce-a thing to be bought and sold-merchandise, in fact ; -- and, from the necessities of the real ultimate purchasers-the governments of England and France, who must have it to carry on the war, will rise to a price above its intrinsic value. The laws of trade will, no doubt, eventually revenge themselves, and assert their inevitable supremacy; but the immediate effect must be a drain of specie from the United States, even in spite of commercial exchanges and trade balances. The European govemments will pay a higher price for specie than our banks can pretend to do without bankruptcy, and they will get it, and our banks must part with it .--We must confess that, in our humble opinion, a conpayments, even in this country, a contingency very hard to avoid or avert.

half, so they can get the money. In the last years hundred and forty-six in currency. If the war conit will put all its latent virtues to the severest test.

It is well enough to look these things in the face probabilities, and it is well to bear them in mind.

MELANCHOLY ACCIDENT .- This morning about 7 to 8 o'clock, while the omnibus belonging to Holmes' Hotel was being driven up Front street to the stable, the herses took fright at something and commenced running a little below Princess street. At the crossing of Front and Princess the omnibus received a severe jar from striking against the flags at the crossing, which rendered the horses still more unmanageving, appears to have been in some measure unseated at this point and could not recover himself. While attempting to restrain the horses he was thrown from his place, and would appear to have fallen on vailing. A colored man "David," who was on the long, and a magnificent vessel. box at the same time, was thrown off nearly two equares above, but not hurt. The omnibus came in contact with a dray in the neighborhood of Front and Walnut, when it was upset and torn to pieces and the horses got loose from it. Mr. Holmes fell about one-third of a square above Princess street.

Mr. Holmes was thirty-one years 6 months and 22 days old, and had before him the prospect of a long and useful life. Few men were more popular than he and none more deservedly. He was an amiable, clever, generous man in all the relations of life, and his loss will be sincerely regretted by a large circle of friends and relations .- Daily Journal 26th inst.

Thanksgiving Day.

Yesterday, being the day indicated in the procla mation of Governor Bragg, and that recommendation endorsed by our town authorities, was very generally observed by a cessation from business. In many respects the day resembled Sunday. As usual on such occasions, there was service in most, if not all, of the churches, and the attendance appears to have been general. There were the usual number of family reunions, etc.; a rather larger amount of stimulant may have been swallowed than on average days, but there was little or no intoxication observable. Upon the whole, the occasion was a pleasant one-the day was fine-the people in good humor, and inclined to express their thankfulness by a genial spirit, marking their appreciation of the blessings of Providence. We have heard of no accident occurring during the day .- Daily Journal 26th inst.

By the way, we intend hereafter to say nothing about any anti-slavery features in Northern Magazines. Our Southern people cannot be unaware of the character of nearly all of them, yet they flourish and sell readily at the South, while the " Southern Literary Messenger," a purely Southern periodical of fully as much ability, is now dying for actual want of support. We have nothing to say; we have al ready said our say. We think that it ought not to be so, but we cannot help it.

It appears that a violation of the recent treaty was exhibited towards Commodore Rogers, Commander of the United States surveying squadron in the North Pacific, at Ousima, one of the Loo Choo group of islands, where he was refused wood, water and provisions, and the services of a pilot. Commodore Rogers immediately sought out the King, and commenced negotiations in the most effectual way, attended by two hundred sailors, marines and officers, with some field pieces,

The Japanese officers got alarmed, and endeavored to stop the Commodore on his way by an invitation to a grand banquet, but our commander was not to be turned from the path of duty by the allurement of even "worms in every style," and on he went to the chief, who, after some talk, furnished all that was required. The Americans at Simoda were most grateful to the Commodore for his firmness on the occasion. Commodore Rogers afterwards partook of a banquet with Isava "Prince of Idzee. The Russians and Americans at Simoda had a grand banquet in the temple of Yokushen, but they took the precaution to turn all the gods with their faces to the wall, lest they should be shocked by looking on the profanity of a waltz or gallopade. In defence of the Japanese, with regard to want of faith Loo Choo and contracted a debt of eighty dollars, in finding Dr. Kane and party: which she refused to pay, and sailed away. It is also alleged that the same ship settled an account for provisions at the Bonin Islands with a fair wind and flowing sheet.

Food Riots in Sweden.

The dearness of food has occasioned some riotous demonstrations in Sweden. At Kariskrona, on the 20th ult., the workmen in the naval dockyards assembled in a body, and invaded the residence of the Civil Governor of the province; some of them even entered his private apartments, and insisted on speaking to him. The Governor appeared, and after hearing their complaint, ordered them to return to their work, threatening, if they did not, to request the admiral commanding the town to take energetic measures against them. They, however, demanded that steps should be taken to prevent distillers from buying up all the potatoes brought to market. A Good One.—A very good widow lady, who was looked up to by the congregation to which she belonged as an example of piety, contrived to bring her conscience to terms for a little indulgence. She loved porter, and one day, just as she had received a half dozen bottles from the man who usually brought her the comforting beverage, she, O herror, saw two graven elders of the church approaching her door. She

SAD EFFECTS OF SPIRITUALISM.—The Roundon Courier tells of a young man, named William Whid. dit, a "medium" in that village, who, on Sunday before last, was suddenly seized while in church with blindness, and soon after with utter loss of speech—calamity which he still endures. He lies in a condition of stupor, but without any physical diserse. The active agents of this melancholy affliction are still unconvinced of the pernicious character of the influences they set to work upon the young man. They assert that the miserable state in which he lies is a most glorious condition; that his physical senses are suspended only to make the interior illumination more brilliant, and that when he returns to the worldlife again, he will know immensely more than he ever was before aware of.
